

A photograph of a renewable energy site. In the foreground, two people wearing yellow safety vests and white hard hats are walking on a grassy field. The woman on the left is holding a tablet, and the man on the right is holding a smartphone and gesturing with his hand. In the background, there are rows of solar panels on the left and a large wind turbine in the center. The sky is blue with some light clouds.

“Know The Industry Expert

Welcome to Green Solar, your premier partner in Sustainable energy solutions! With over a five thousand successfully completed solar projects under our belt, spanning residential, commercial, and institutional sectors, we stand tall as the Leading solar Installation company in South India.

At Green Solar, our commitment to excellence is unwavering. We prioritize quality in every aspect of our work, from the materials we use to the expertise of our technicians. Our team of experienced professionals ensures that each project is executed with precision and care, delivering optimal results that exceed expectations.

With a focus on harnessing the power of the sun to create a brighter, cleaner future, Green Solar is dedicated to providing innovative and reliable solar solutions tailored to meet your specific needs. Whether you're looking to power your home, business, or institution with clean, renewable energy, we have the expertise and resources to make it happen.

Join the growing number of satisfied customers who have made the switch to solar with Green Solar. Experience the difference of working with a company that prioritizes quality, reliability, and sustainability in everything we do. Together, let's pave the way towards a greener tomorrow with Green Solar.

WHY GSR

“WHY WE ARE
SO SPECIAL

01

Completed More Than 5000 Projects

Green Solar has completed More than five thousand projects across kerala

02

Completed 500 Commercial Projects

We have completed More than five hundred projects across keralaincluding commercial projects & institutional projects

03

More than 800 Signature Projects

Successfully completed More than eight hundred heavy projects which made us most experienced team in south India

04

Unbeatable Commercial Offer

We provide best commercial offers to our valuable customers for installation & Services

05

Well Experienced Technicians

We have got well experienced and trained technicians for installation & Services

06

Advanced Monitoring Facility

We are the only team in industry with live advanced monitoring facility

07

Timely Execution and Installation

As we got own technicians and advanced tools, we assure timely execution & installation

08

Excellent Customer Support

We Provide irreplaceable customer support for consulting, installation and post services

09

Pan Kerala Project & Service

As we have got franchise all over Kerala we can complete the project as soon as possible and the services too

WHY GREEN ENERGY

ENERGY PORTFOLIO

As your main source of comfort from extreme outdoor temperatures, HVAC system uses the most energy of any single appliance or system at 45 percent of the average energy consumption

ELECTRIC VEHICLES

Electric cars are game changer for the near future. The cost of running an electric car is directly related to its energy consumption. Studies show that by charging an electric car an average consumption shall go up to 30 percent

EQUIPMENTS

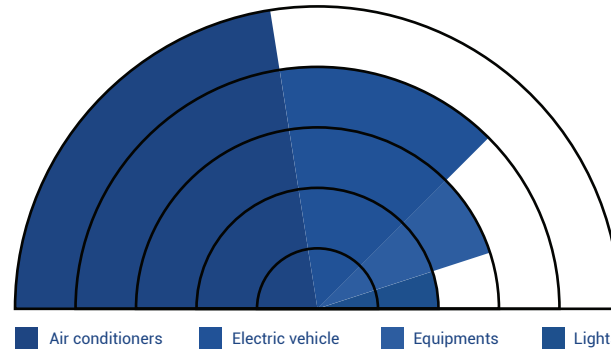

Your electrical equipments including pumps, geysers, computers, elevators etc account for around 15 percent of an average electricity bill

LIGHTING

Lighting accounts for about 10 percent of a typical energy use. Light bulbs energy use can vary widely based on bulb type and usage

PAY BACK PERIOD

Payback period is achieved at a stage where the invested amount for the total solar plant is paid back considering the saving on the electricity bill tariff increase and the income tax benefit availed through depreciation applicable for commercial customers

SOLAR SAVINGS MULTIPLY

Unlike any investment the savings from the solar system is paid from the initial day of commissioning of the plant by saving on the electricity bill. The ROI is achieved in a short period and the savings continue to multiply considering the life time of the system and the inflation in the energy tariff from utility providers.

SAVE MONEY

Switching to solar energy can greatly reduce your electricity bills and save you money in the long run. By generating your own power

SAVE ENERGY

Switching to solar energy conserves natural resources by reducing the need for current energy sources. By harnessing the power of the sun, we decrease our dependence on nonrenewable energy sources.

SAVE NATURE

Embrace solar energy to save energy. Harnessing the power of the sun not only reduces our reliance on finite resources but also paves the way for a sustainable future. Let's shine a light on a brighter, more energy-efficient world

SAVE FUTURE

Switching to solar energy conserves energy by harnessing the sun's power, reducing our dependence on non-renewable resources. This sustainable choice promotes energy efficiency and helps create a cleaner, greener future.

WHAT GREEN SOLAR PROMISE

■ QUALITY ASSURANCE

At GSR Solar Installations, we are dedicated to delivering top-quality solar energy solutions. We use only premium materials to ensure high efficiency and reliable performance. Our expert team guarantees meticulous installation and exceptional service. Trust GSR for a sustainable and dependable solar e-nergy future.

■ PROMPT SERVICE

Comprehensive service network, local presence and fast service time. dedicated mobile service team with skilled technicians experienced in fault identification and resolving the issue

■ PREMIUM MATERIALS

At green solar, we promise to use only premium quality materials for all our projects. Our commitment to excellence ensures that every component meets the highest standards of performance, durability, and reliability. By choosing top-grade materials, we deliver exceptional results that stand the test of time, providing you with unparalleled value and peace of mind.

■ TRAINING

It is the important for the client to understand the basic principles and the operation of the installed solar PV plant. On successful commissioning of the project, an expert from green solar shall carry a detailed onsite training for the client on the operation of the plant and its safety aspects

GSR WARRANTY

GSR warranty projects against unforeseen costs from mechanical or electrical issues that may arise over the life of your PV plant. This assurance provides added confidence to financiers, developers & individuals. it includes 100 percent coverage for all major components and onsite diagnostic and repair services

QUICK INSTALLATION

Professional commissioning is the key to successful PV plant. To ensure that your system is profitable long time. it must be connected to the grid safely and reliably and produce the optimal output right way. Green solar holds an ideal inventory of all components of a solar system and skilled technicians which ensure quick and Safe installation

PREVENTIVE MAINTENANCE

More power, greater efficiency, greater profitability. Regular maintenance improves the performance of your PV system. To ensure maximum operational reliability. We offer cost effective solutions for complete monitoring and routine check of the plant on regular intervals ensuring maximum production of energy and there by enhancing on investment for the customer

“HOW WE ARE ASSURING QUALITY”

AWARDS AND RECOGNITIONS

Green Solar, a pioneering company in renewable energy solutions, has garnered significant recognition and numerous awards for its innovative contributions to the industry. Over the years, Green Solar has been celebrated for its cutting-edge solar technology and commitment to sustainability. The company has received accolades such as the "Best Renewable Energy Company" award at the WAAREE Green Energy Expo and the "Innovation in Solar Technology" award at the Global Renewable Energy Summit. These honors reflect Green Solar's dedication to advancing clean energy solutions and its impact on reducing carbon footprints INDIA.

"WHY WE ARE SO DIFFERENT IN INDUSTRY"

“OTHER PORTFOLIO FROM THE HOUSE OF GSR

SOLAR PLANT SERVICE & WASHING

At green solar, we go beyond just solar installations. We also offer comprehensive solar plant servicing and washing for systems installed by us and others. Our expert team ensures your solar panels operate at peak efficiency through regular maintenance and professional cleaning, extending the life of your investment and maximizing energy production. Whether we installed your system or not, we're here to keep it running smoothly.

GSR WATER SOLUTION

Welcome to GSR Water Solution, your trusted provider of comprehensive water solutions for every need. We specialize in a wide range of services, including home water filters, advanced irrigation systems, and both small and large scale water filtration solutions for commercial and residential purposes. Our commitment to quality ensures that you receive the best products and services tailored to meet your specific requirements. Whether you're looking to improve your home's water.

GSR INSTITUTE OF TECHNOLOGY

A premier institution dedicated to advancing the field of solar energy. We offer comprehensive solar installation courses certified by the National Skill Development Corporation (NSDC). Our programs are designed to equip you with the essential skills and knowledge needed to excel in the rapidly growing solar industry. With a focus on hands on training and real world applications, our courses ensure you are job ready and well prepared for a successful career in solar installation. Join us at GSR institute of technology and become a certified professional in the green energy revolution.
